AWNING & CASEMENT WINDOWS

AWNING & CASEMENT WINDOWS

At home in either traditional or modern styles of architecture, the Westal 048 series Awning and Casement Windows represent great appeal, value and versatility. Which type you select will depend on the functions you require. The 'hood' effect created by an awning window protects the interior from light rain allowing the sash to remain open and ensuring a constant flow of fresh air. Alternatively, a casement sash effectively captures and directs any cool, prevailing breezes to the important areas of your home.

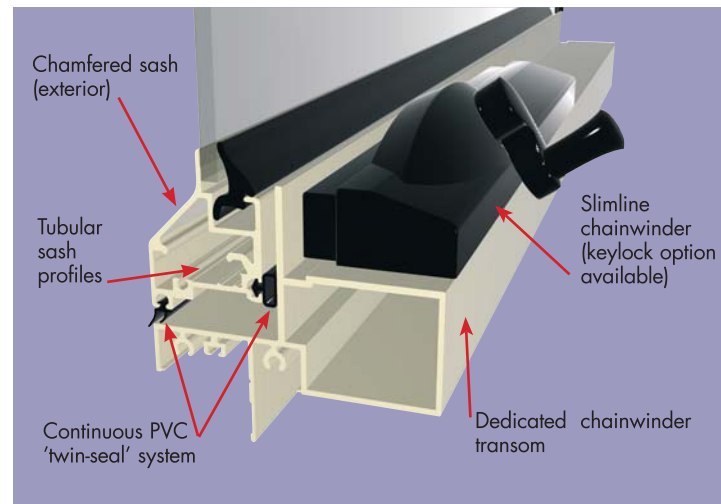

Features:

- Excellent Ventilation control
- Chamfered sash profile creates a clean, flushed-faced external appearance
- Continuous PVC 'twin-seal' system provides superior weatherproofing and cost-effective acoustic qualities
- Tubular sash profiles and structurally glazed panels for maximum torsional strength
- Stainless steel stays and secure lever operated handle
- 7 year 'peace of mind' guarantee*
Keyed sash lock option (shown left) available (additional cost)
* Conditions Apply
